

KevaBook Business Rules

1. Introduction

This document defines the business rules that govern the operation of the KevaBook platform. These rules represent the business policies and constraints that must always be enforced to ensure booking accuracy, scheduling consistency, and tenant isolation regardless of the underlying implementation.

2. Booking Rules

Rule BR-01: No Overlapping Bookings

A Staff member must not have two bookings that overlap within the same time period.

Description

For a given Staff member, only one booking may exist for any specific time interval.

Enforcement

- Validate before creating or updating a booking.
- Prevent conflicting bookings from being persisted.

Rule BR-02: Booking Must Respect Staff Availability

Bookings may only be created during the defined Availability schedule of the assigned Staff member.

Constraints

- Booking start time must fall within an active Availability period.
- Booking end time must fall within an active Availability period.
- Bookings must respect Business operating hours, if configured.

Rule BR-03: Booking Duration

The duration of a Booking must match the configured duration of the selected Service.

Rule BR-04: Valid Booking Time

A booking must always satisfy the following condition:

- Start time must be earlier than End time.

3. Staff Assignment Rules

Rule BR-05: Staff Selection

The current version of KevaBook supports client-selected Staff.

Description

During the booking process, the client selects the Staff member who will provide the requested Service.

Future Enhancement

A future version of the platform may support automatic Staff assignment based on:

- Staff availability
- Workload balancing
- Service compatibility

4. Multi-Tenant Rules

Rule BR-06: Tenant Isolation

All operational data belongs to a single Business tenant.

Constraints

- Every tenant-owned domain entity must belong to exactly one Business.
- Data belonging to one Business must never be accessible by another Business.
- All business operations must be performed within the context of the authenticated Business.

Rule BR-07: Staff Ownership

Each Staff record shall belong to exactly one Business tenant. If the same individual works for multiple Businesses, each Business shall maintain its own independent Staff record. Staff records are tenant-owned resources and are not shared across Business tenants.

Constraints

- Every Staff record must reference exactly one businessId.
- A Staff record cannot belong to multiple Businesses.
- Availability schedules, service assignments, and bookings are associated with the Staff record owned by the same Business.
- Changes to a Staff record shall not affect any other Business tenant.

5. Booking Lifecycle Rules

Rule BR-08: Booking Status

A Booking shall exist in one of the following states:

- PENDING
- CONFIRMED
- CANCELLED
- COMPLETED

Only valid status transitions are permitted according to the business workflow.

6. General Validation Rules

Rule BR-09: Mandatory Relationships

Every Booking must be associated with

- one Business
- one Staff member
- one Service

Booking cannot exist without these relationships.

Rule BR-10: Guest Booking

Clients may create bookings without creating an authenticated account.

Client information must still be captured as part of the booking process.
